OUR REVOLUTIONARY TECHNOLOGY

Our manufacturing process uses a moulding technology system, meaning Artusi Granitek sinks consist of a substantial and even distribution of its components including within the sink mass. This technology is internationally patented.

Granitek is the name given to our process of bonding granite and acrylic resin. This process results in the highest-quality finish, as it gives greater protection against high temperatures, cracks and chips, and is more resistant to heavy impacts.

CERAMISATION is a method of colouring the granite particles by penetrating the whole mass, through a firing process of heating the material to over 700°C. This ensures the colour can penetrate deeply, reaching particles' core. The result is a significant improvement to resistance against discolouration.
